## Image avatars

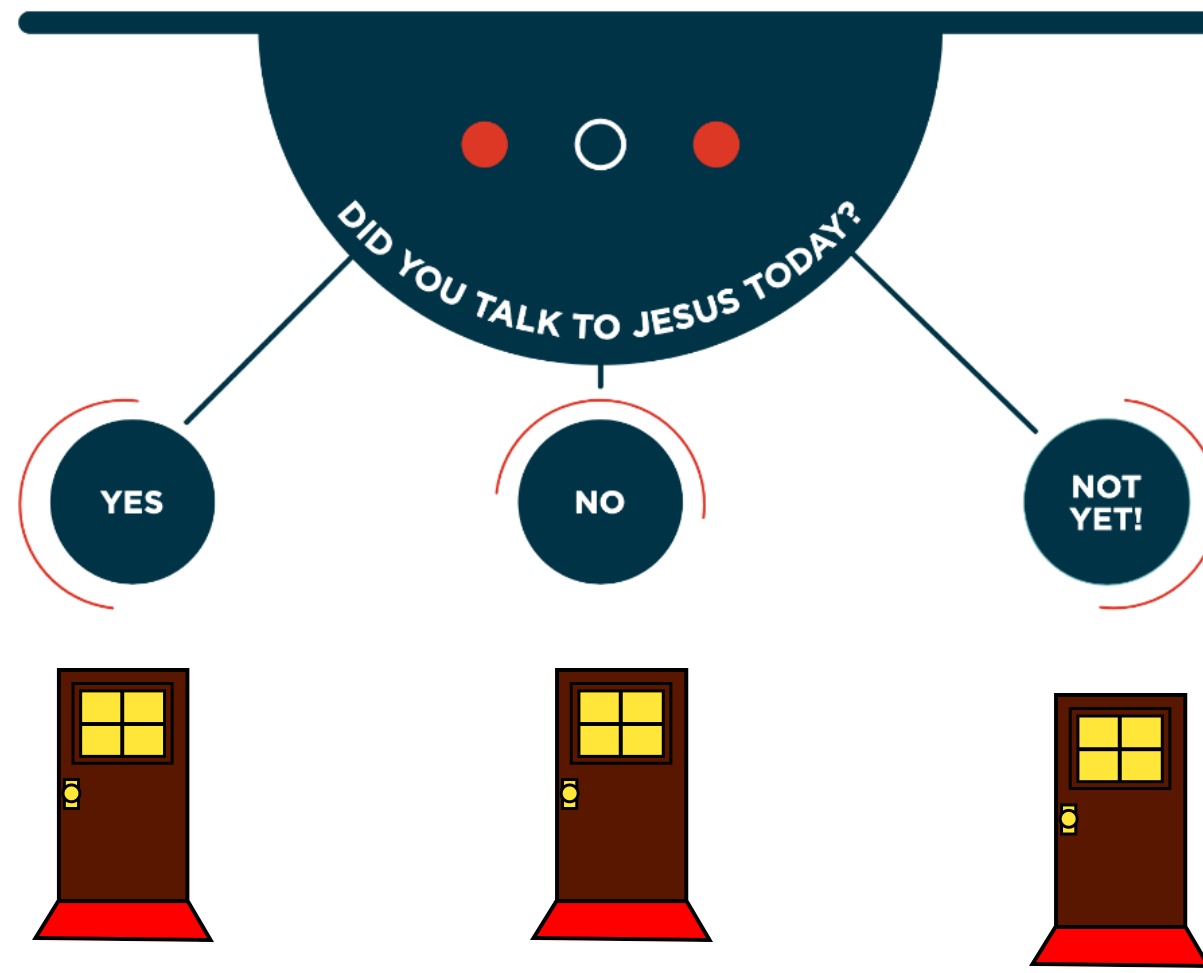

Image avatars can be created by passing standard `img` props `src` or `srcSet` to the component.

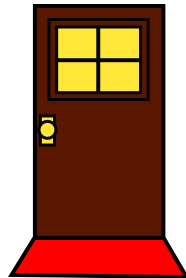

```
<Avatar alt="Remy Sharp" src="/static/images/avatar/1.jpg" />  
<Avatar alt="Travis Howard" src="/static/images/avatar/2.jpg" />  
<Avatar alt="Cindy Baker" src="/static/images/avatar/3.jpg" />
```

## Letter avatars

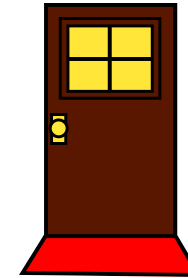

Avatars containing simple characters can be created by passing a string as `children`.
